

# Digital Sedation™

Non-pharmacological management of pain and anxiety

Oncomfort Digital Sedation™ is a new method for relieving patients' pain and anxiety before, during and after medical procedures.

This revolutionising digital therapy combines clinical hypnotherapy and integrative therapeutic techniques through Virtual Reality.

**65,000+** patients

**80+** hospitals

**25** studies

**7** countries

## An adapted medical device

Digital Sedation™ is a proven alternative to light, moderate or deep sedation. This medical device is perfectly adapted to various types of interventions and specialities, to the different phases of the medical procedure - before, during or after - and to the specificities of the patient such as age and language.

## A clinically proven solution

This new therapeutic approach, validated by randomised scientific studies, results in unequalled patient comfort, better operating conditions for practitioners - smoother and uninterrupted - and a significant improvement in clinical results.

# Digitale Sedation™

A proven and effective alternative

*The benefits of*

*patient-centred therapy*

## More comfort and satisfaction for the patient

- Up to 100% replacement of pharmacological sedation<sup>1</sup>
- From 45% to 59% reduction in preoperative anxiety<sup>2 and 3</sup>
- More than 50% reduction in pain<sup>4</sup>
- 4 modules for children and 4 for adults available in 11 languages

1 - Moon et al., 2018

2 - Di Primio et al., 2018

3 - Rosay et al., 2017

4 - Oosterlinck et al., 2020

## Healthcare professionals focused on the medical procedures

- 65% reduction in involuntary patient movements during the operation<sup>1</sup>
- 85% reduction in the risk of apnea during the operation<sup>1</sup>
- A 49% improvement in operating conditions for anaesthetists<sup>1</sup>
- An average reduction in the duration of the intervention by 11%<sup>1</sup>

## Cost-efficient innovation for healthcare institutions

- Cost-effective and efficient alternative for the management of anxiety and pain
- An alternative to the use of opioids and pharmacological sedatives
